

## GreenSoft Updates GreenData Manager–Conflict Minerals Module Software for IPC–1755

**Pasadena, CA, October 14, 2014** – GreenSoft Technology, Inc., a leading provider of environmental compliance data services and software, has released a new software upgrade to the GreenData Manager Conflict Minerals Module. The Module now supports the conversion of Conflict Minerals data between CFSI CMRT 3.0/3.01 form and the IPC–1755 XML data.

Established in April 2014, the IPC–1755 data exchange standard was developed after the U.S. Securities and Exchange Commission (SEC) adopted conflict minerals legislation in September 2012. IPC–1755 helps suppliers and OEMs exchange conflict minerals data along the entire supply chain.

GreenData Manager’s Conflict Minerals Module is a powerful add–on that allows users to gather, validate and manage their conflict minerals supply chain data for due diligence documentation, as well as generate the company level or BOM level Conflict Minerals declaration in either CFSI CMRT format or IPC–1755 XML format.

Larry Yen, President of GreenSoft Technology, states: "This upgrade to the GreenData Manager–Conflict Minerals Module allows electronics manufacturers to use the most updated IPC standards for their conflict minerals declaration, making their due diligence documentation process quick and easy for annual reporting requirements."

Using IPC–1755 format standards, GreenData Manager software allows suppliers to submit the conflict minerals declaration data in IPC–1755 XML files, and allows manufacturers to generate company level, product/product–list level or user defined level files in IPC–1755 XML format, so that the data exchange among upstream suppliers or downstream customers can be achieved fast and easy.

### **About GreenSoft Technology, Inc.**

GreenSoft Technology is a leading provider of environmental compliance content management tools and services for the global electronics industry. GreenSoft data management services streamline development cycles, cut procurement costs, reduce risk, and aid in environmental compliance reporting. GreenSoft’s GreenData Manager software provides an out–of–the–box compliance management solution for manufacturers. GreenSoft is ISO 9001:2013 certified and is headquartered in Pasadena, California.
