GreenData Manager

Component Database Search

Instant Compliance Status for Millions of Parts

Allow your engineering and product design team to qualify parts for compliance instantly with **iGDM Component Database Search**.

With **iGDM**, customers can access **GreenSoft's multi-million parts database** from anywhere via the Internet through **GreenData Manager (GDM) Browser Edition (GDM-BE)** or **Hosted GDM**.

Instantly see the up-to-date **RoHS and REACH SVHC compliance status** for millions of parts. The iGDM database is populated by **high quality data** that has been collected and verified by GreenSoft's data collection team.

Search for matches using a single part number or multiple part numbers at once. **iGDM** will return search results presenting the number of parts matched or unmatched from your company's own parts database. You can then view the compliance status of unmatched parts using data pulled from **GreenSoft's iGDM component database**. Parts can be added to the data collection and processing pool for GreenSoft to input the compliance status and compliance documents into the **GDM software** for you.

Give your engineering and product design team the freedom to make decisions in real-time while complying with your company's environmental health and safety standards with **iGDM Component Database Search** for **GDM-BE** and **Hosted GDM**.
