

GreenData Manager[®]

Workgroup Edition

Environmental Compliance Data Collection and Management Tool For RoHS-2, REACH SVHC, and Other Regulations

The Challenge: Compliance with RoHS-2, REACH SVHC and more

Complying with global chemical regulations and directives like **RoHS-2** and **REACH SVHC** is difficult. Regulations evolve, customers have unique reporting requirements, and collecting and updating information is not easy.

The best way to manage compliance is to collect full material disclosure data (FMD) for all components from suppliers. But how do you manage the data? How do you use the data to prove compliance? And how do you share that information across the enterprise?

The Solution: GreenData Manager

GreenData Manager Workgroup Edition is a powerful client-server application tailored for medium to large enterprises.

- ✓ Manage the collection and storage of compliance data and documents
- ✓ Perform compliance validation and substance analysis for 22 built-in regulations like **EU RoHS-2**, **China RoHS**, **REACH SVHC**, **CA Prop 65**, **Halogen Free** and many more, or build your own rules
- ✓ Generate compliance reports and full disclosure reports at the product/BOM and company level
- ✓ Install at your facility behind company firewall so data/BOMs security are protected
- ✓ Import compliance data automatically and import BOMs from ERP/PLM software programs automatically (optional)

GreenData Manager Workgroup Edition Benefits

GreenData Manager (GDM) Workgroup Edition is an inexpensive comprehensive solution for global regulation compliance and product full disclosure of chemical substances in one easy-to-use package.

The software can be tailored to fit your company needs such as easily integrating with common PLM or ERP systems. The centralized component database for chemical substance data can be accessed by multiple users in the same network. You also have the option to expand the workgroup access globally with Internet users.

Flexible Packages to Fit Your Needs

Starter Package

- Server + 2-seat license
- 1st year of Maintenance free
- Client side can be Windows 7/8/10
- Centralized database on MS SQL Server

Extra

- Additional seat license is available
- Auto Download Module is available
- Auto BOM Import Module is available
- Conflict Minerals Module is available

Feature Highlights

- Report the **completeness status** on the data or documents you have collected.
- Report the **compliance status** on all parts or BOMs and generate **compliance reports** for **EU RoHS-2, China RoHS, CA Prop 65, EU MDR, Halogen-Free, EU REACH Annex-14, EU REACH Annex-17, EU REACH SVHC** and many other regulations. Or define your own compliance rules per your customers' requirements.
- Receive **online updates** of changes to regulations and substance data so you're always dealing with the most up to date information.
- **Import** the component compliance data through Excel, IPC-1752 v1.1 XML or IPC-1752A XML, or have GreenSoft to collect the data and deliver to you through GreenSoft PartData XML format.
- Generate product level **full disclosure reports** to show the full list of chemicals used in products.
- Generate **product disclosure reports** in Excel, IPC-1752 v1.1 XML, IPC-1752A XML, and IEC 62474 XML formats.
- Keep **data securely stored** behind your own company firewall with the software downloaded on your own company server. All BOM level information is kept within your facility.
- Plus, **GDM** software now has the ability to **classify and process articles** per the updated definition of an "article" under **EU REACH**.

Bonus:

Sign up for our **Data Services** and we'll collect and validate the data from your suppliers for you!

A Complete Compliance Management System

For the full details of how GreenSoft's **GreenData Manager Workgroup Edition (GDM-WE)** can help you manage your data collection, compliance validation, substance analysis and product level full disclosure of chemical substances, read on for a step-by-step example of **GDM-WE** features.

1. Data Collection Management

- Import the data you have collected through Excel, IPC-1752v1.1, IPC-1752A XML, or ask GreenSoft to collect, validate and provide the data in GreenSoft's proprietary PartData format.
- Data can be imported automatically through Auto PartData Import module.
- Examine and validate EU RoHS-2 status and Exemption Status provided by suppliers.
- Validate the aggregated substance weight against the component weight or subpart weight with user-defined tolerance.
- Validate document collection status and expiration status; alert 30-days before documents expire.

2. Compliance Validation and Gap Analysis

- Determine compliance status of parts and BOMs immediately; Perform Gap Analysis on selected products (BOMs) for incomplete parts or non-compliant parts inside each BOM.
- Perform compliance validation on one of 22 Built-in regulations or define your own rule per your customer requirements.
- Perform compliance validation on one regulation for one BOM, or perform compliance validation on multiple regulations for multiple BOMs.
- Export compliance report and Gap Analysis report to Excel, or report BOM level compliance in IPC-1752A/IEC-62474.

Level	BOM ID/IPN	MFG Name	MPN	2nd Source	BOM Name/Description	Match Status	Completion Status	EU RoHS Status	R2 Status	R3 Status	R4 Status	C/C Status	MCD Doc Status	Quantity

3. Product Compliance Report

- Validate compliance at product level on a specific compliance regulation or any customer-specific requirements.
- Roll-up weight and ppm for each substance or substance group at product level or at component level (for the new component level EU interpretation of the REACH SVHC regulation).
- Generate compliance status for each substance or substance group at product level.
- Conduct partial analysis during the data collection process and generate “GAP Analysis” report for incomplete parts.
- Perform Failure Analysis on BOMs that fail to comply with regulations or customer requirements and generate report.

BOM SVHC Report
Generates an SVHC report for the selected BOM. You could then export the report to Excel. Double-click a row to generate the Substance Analysis Report.

4. Due Diligence Report for EU RoHS-2

- Generate BOM level due diligence reports as part of the technical documents for CE Mark per EN50581:2012.
- List unique parts list from the BOM with EU RoHS compliance status and due diligence documents such as Certificates of Compliance (CoC) or lab test reports or FMD documents. All documents are hyperlinked and accessible through simple clicks.

Item No	Internal PN	Manufacturer Name	Manufacturer PN	Description	2ND	QTY	Units	EU RoHS Status	EU RoHS CoC Status	EU RoHS PoC Status	Exemptions

5. Product Level Full-Disclosure

- List of all substances used in the product (Product DNA).
- Roll-up weight and ppm for each substance to product level.
- Product level RoHS-2 compliance status included.
- Product level SVHC compliance status included.
- Export product level full-disclosure report to Excel, IPC-1752v1.1, IPC-1752A, or IEC 62474 XML format.
- Exception Report lists parts unable to be included in product rollup.

Product Level Disclosure
Generates Product Level Full Disclosure for the selected BOM. Export the report to Excel or to IPC-1752 Class-6 XML or IPC-1752A XML. Mask Trade Secret Substances Close

6. Automation of PartData Import & BOM Import (optional)

- Complete automation of importing the PartData files if GreenSoft is doing data collection for you.
- Complete automation of importing BOMs from your ERP/PLM system.
- Frees you from manual work of updating PartData. Simply select the desired BOM and click to generate compliance reports instantly.
