

## GreenSoft Technology, Inc. Launches IPC-1752A Viewer

**Pasadena, CA, September 14, 2015** – GreenSoft Technology, Inc., a leading provider of environmental compliance data services and software, has released IPC-1752A Viewer, a new online data converter tool enabling the instant conversion of IPC-1752A compliance data from XML format to a readable user-friendly HTML format. GreenSoft is offering the tool to the public for free as a benefit to the environmental compliance industry.

IPC-1752A XML has become the standard format for electronics manufacturers to exchange compliance information and material declaration data. But IPC-1752A XML files are designed for exchange between machine to machine, and does not allow for a human eye to read the data.

For years, GreenSoft Technology has provided IPC-1752A Viewer integrated into our GreenData Manager (GDM) software. This tool has gained so much popularity with customers that GreenSoft decided to release a free web version of the tool for public use. The new IPC-1752A Viewer by GreenSoft is the first and only free online tool that allows users to convert IPC-1752A XML files into an easy-to-read format.

IPC-1752A Viewer is free to use and requires no software installation. Users upload an XML document to GreenSoft's online portal and the data is instantly converted to an easy-to-read HTML format contained in a downloadable zip file.

IPC Viewer is accessible online at the following link: <http://greensofttech.com/site/ipc-1752a-viewer-by-greensoft/>

"IPC-1752A provides a standardized format for communicating materials in products across the supply chain. This helps companies better manage the ever-increasing need for materials disclosures," said David Bergman, IPC Vice President of Standards and Technology. "The availability of third-party viewer tools to check for well-formed XML and visual inspection of files are important enhancements to the standard and its users."

Larry Yen, President of GreenSoft Technology, states: "It has always been GreenSoft's mission to simplify the compliance process and handle the leg work for OEMs so they can focus on their core competencies. Providing IPC-1752A Viewer as a free online tool for the environmental compliance industry allows us to further achieve that goal by giving companies a quick and easy way to review their compliance data."

### **About GreenSoft Technology, Inc.**

GreenSoft Technology is a leading provider of environmental compliance content management

GreenSoft Technology, Inc.  
155 S. El Molino Avenue, Suite 100  
Pasadena, CA 91101
