

Electronic Component Material Assessment (eCMA) Forms

**Plus FMD Processing and CMRT Collection
For Suppliers to Boston Scientific**

Solution for Suppliers to Boston Scientific

GreenSoft has a solution for suppliers who must submit documentation on material composition and regulation compliance to **Boston Scientific**. We provide data collection, validation and reporting services for regulations such as **EU RoHS**, **EU REACH**, the **EU Medical Devices Regulation (MDR)**, **Conflict Minerals**, and others.

As part of our Data Services, we can generate both **component-level** and **product-level Full Material Disclosure (FMD)** data, and transfer that product disclosure data into **eCMA format** for submission to Boston Scientific's **BSC Corporate Supplier Portal**. We can also generate **CMRT forms** for conflict minerals submissions.

GreenSoft Data Services provide coverage for:

- ✓ Electronic Component Material Assessment (eCMA) forms
- ✓ Full Material Disclosure (FMD) data
- ✓ Conflict Minerals Reporting Templates (CMRT)

Boston Scientific is one of the largest medical device manufacturers in the world. The company expects its suppliers to provide complete and accurate data for their parts. GreenSoft takes care of collecting and preparing this data for you so that you can focus on producing and selling your products. Contact us to learn more and receive a demo.

Full Material Declaration (FMD) Processing

Boston Scientific expects its suppliers to provide disclosure on 100% of the material composition for all supplier parts and components. As part of our **Data Services**, we can generate **FMD data** on your parts at both the component-level and the product-level. Plus, we can convert that data into **eCMA format** for submission to Boston Scientific.

Establishing an **FMD database** is not only required by Boston Scientific, but it is also the best practice to reduce your burden of providing updated compliance declarations to customers when regulations are changed. Instead of providing individual compliance declarations for each package or component, give your customers FMD data and **eliminate the need to re-issue compliance declarations** every time a regulation is updated.

Conflict Minerals Reporting Templates (CMRT)

In addition to FMD data and eCMA forms, Boston Scientific also requires its suppliers to provide **Conflict Minerals** data through the BSC Corporate Supplier Portal. We provide full **Conflict Minerals** data coverage as part of our **Conflict Minerals Data Services**.

Just send us a parts list and we'll collect and validate the **Conflict Minerals Reporting Template (CMRT)** provided by your suppliers, aggregate the information and generate a CMRT at the company-level or BOM-level per your requirements.

Our **Conflict Minerals Data Services** provide:

- **High quality supply chain data** through our 100+ Point Data Validation System
- **Rigorous follow-up with suppliers** during Reasonable Country of Origin Inquiry (RCOI)
- **Dedicated teams to monitor changes** to legislation and smelter lists
- **A dedicated Project Manager** assigned to your project to provide bi-weekly/monthly status updates so you can be sure your project stays on track

The GreenSoft Difference

GreenSoft has been helping manufacturers manage their compliance data for over 18 years by providing **Data Services**, **Turnkey Service**, and the award-winning **GreenData Manager®** software.

GreenSoft is **ISO 9001:2015** and **ISO 27001 certified** and has a **broad range of expertise** in active and passive components, electrical and mechanical parts, packing and printing materials, and raw materials including gas and chemicals.
