

SCIP DATABASE

A Complete Turnkey Solution for SCIP Database Submissions

A Complete Turnkey Solution for the EU SCIP Database

The new EU **SCIP Database** submission requirements affect companies of all sizes that are manufacturing, assembling, and importing products onto the European Market.

Mandatory submissions to the **European Chemicals Agency (ECHA) SCIP Database** online portal require extensive data collection and data analysis on the parts and substances contained within your products.

GreenSoft Technology, Inc. offers a comprehensive **Turnkey SCIP Solution** for affected companies, providing you with everything you need to meet your **SCIP Database** submission requirements.

No matter what stage of SCIP data collection your company is in, whether you have already collected some or all of the required data, or if you haven't started collecting any data at all, GreenSoft Technology's **Turnkey SCIP Solution** will take care of your SCIP obligations for you.

Let GreenSoft Handle Your SCIP Database Submissions For You

GreenSoft Technology's **Turnkey SCIP Solution** allows companies to focus on their core business instead of trying to figure out complicated legal jargon and analyze substance data to meet regulatory requirements.

All we need from you to get started is your Bill of Materials (BOM) and TARIC codes for the products you sell, manufacture, or assemble in the EU.

Then we'll walk you through how to create an account for the ECHA online **SCIP Database** portal, and grant us access to submit on your behalf.

GreenSoft Technology will take it from there! We'll collect, prepare, and submit SCIP dossiers to the **SCIP Database** online portal for you.

Our data collection team will contact your suppliers directly to collect **Substances of Very High Concern (SVHC)** data on your parts, and validate that data for accuracy and completeness.

We use **direct person-to-person communication** rather than online portals to ensure that all parts are accounted for and all necessary data is received.

SCIP DATABASE TURNKEY SOLUTION

Streamlining SCIP Data Collection, Submissions, and Ongoing Updates

As part of our **Turnkey SCIP Solution**, GreenSoft Technology will:

- Contact your suppliers to **collect and validate SVHC data** on the parts in your BOMs.
- Complete the **mandatory SCIP data files** for all parts that require submissions to the SCIP Database.
- **Generate a SCIP Dossier** for each of your BOMs (or group BOMs into a single SCIP Dossier for BOMs in the same product family with the same SVHC profile).
- **Submit the SCIP Dossiers** to the ECHA online SCIP Database portal on your behalf.

Plus, GreenSoft Technology keeps you covered for the long-term. We scan for changes on parts with reportable SVHCs on an ongoing basis, and update any affected SCIP Dossiers to submit to the online **SCIP Database** portal monthly.

Keeping Your Confidential Data Safe

Submissions to ECHA's online **SCIP Database** portal require companies to disclose the articles and locations of articles within their products, as well as the hierarchy of their BOMs, which puts companies at risk of having their data and trade secrets exposed.

GreenSoft Technology's **Turnkey SCIP Solution** includes a **unique article ID system** to keep your trade secrets private. We generate a displayable name for articles that we submit to the online **SCIP Database** portal, providing ECHA with the required component information, article location, and BOM hierarchy without exposing your sensitive data. Contact us today to get started.
