GreenData Manager®

AWARD-WINNING SOFTWARE

Compliance Data Management and Reporting Software
for EU RoHS, EU REACH, and Other Environmental Regulations

Manage Data for EU RoHS, EU REACH SVHC and More

GreenData Manager (GDM) is a powerful software tool to help you manage and report on parts and components substance data for compliance with environmental regulations such as **EU RoHS**, **EU REACH SVHC** and **Conflict Minerals** legislation.

GDM software makes managing and reporting on substance data easy for **27 built-in regulations** such as **EU RoHS**, **China RoHS**, **California Proposition 65**, **Halogen-Free**, **EU REACH Annex-14**, **EU REACH Annex-17**, **EU REACH SVHC** and many others, with an optional **Conflict Minerals Module**. Or define your own rules based on your customer requirements.

Plus, you'll receive **online updates** of changes to regulations and substance data so that you're always dealing with the most up-to-date information.

Once substance data is collected from your supply chain and imported into GDM software, you'll be able to perform functions such as:

- Report on the **compliance status** of parts or Bills of Material (BOMs).

- Generate **compliance reports** and **full disclosure reports** and export to Excel, IPC-1752, IPC-1752A, IEC 62474, and other formats.

- View the **completeness status** of data collected from suppliers.

Bonus: Leave the data collection from your suppliers to us with GreenSoft's **Data Collection Services**!

GDM is available in multiple editions and your parts data and BOMs are always **securely protected**. GDM can be installed at your facility behind your company firewall, or hosted on GreenSoft's online virtual server for access through **Hosted GDM**. GDM is fully compatible with most ERP/PLM software programs.

GREENDATA MANAGER (GDM) SOFTWARE

Flexible Packages to Fit Your Needs

There are four software editions of **GreenData Manager (GDM)** so you can pick the option that best suits your company's configuration, with an optional **Conflict Minerals Module**. All Editions include **online updates** for changes to regulations or substance data, and **2 hours of personalized training**.

GDM Desktop Edition
Single desktop application perfect for small to medium size businesses. Stored on your company's own server.

GDM Browser Edition
Multiple users access data through an Internet connection from any location. Schedule automatic report generation at fixed times or intervals.

GDM Workgroup Edition
Multiple users access data through customer's own network. Choose between Starter Package with server software + 2 seats or Enterprise Package with server software + 5 seats.

Hosted GDM
Your BOM data is hosted on GreenSoft's online virtual server. Users can access Hosted GDM from anywhere via the Internet. IT Administration and Data Collection is handled by GreenSoft.

Conflict Minerals Module (optional)

Compliance with **Conflict Minerals** legislation has its own set of unique due-diligence requirements. The GDM **Conflict Minerals Module** is compatible with any GDM edition above and allows you to:

- Import and export **Conflict Minerals Reporting Template (CMRT) forms**.
- Create CMRTs at the **company-level**, **product family-level**, **or product-level** by aggregating the CMRTs collected from suppliers.
- Generate **due diligence reports** and **smelter analysis reports** for company, BOM, or group of BOMs.
- And much more! Visit us online or contact a sales rep to learn more.

The GreenSoft Difference

GreenData Manager (GDM) software was purposefully designed just for compliance data management so it can deal with the detailed nuances of substance data. GDM is intuitive and user-friendly.

GDM is an economical choice compared to other similar software programs, and your data can be securely stored behind your own company firewall or cloud hosted.

GreenSoft has been helping manufacturers around the globe manage their compliance data for over 20 years by providing **Data Services** and **GreenData Manager** software. The GreenSoft team provides global coverage in multiple languages. GreenSoft is **ISO 9001:2015** and **ISO 27001** certified.
