

GREENDATA MANAGER® SOFTWARE WORKGROUP EDITION

Environmental Compliance Data Management Reporting Tool for EU RoHS, EU REACH, and Other Regulations

The Challenge: Compliance with EU RoHS, EU REACH, and More

Complying with global chemicals regulations and directives such as **EU RoHS** and **EU REACH** is difficult. Regulations evolve, customers have unique reporting requirements, and collecting and updating information is not easy.

The best way to manage compliance is to collect **Full Material Disclosure (FMD)** data for all components in your products. But how do you collect that data from suppliers? How do you manage and store the data? And how do you share that information across the enterprise?

The Solution: GreenData Manager Workgroup Edition (GDM-WE) Software

GreenData Manager Workgroup Edition (GDM-WE) software is a powerful client-server application tailored for medium to large enterprises. **GDM-WE** offers an inexpensive, comprehensive solution for global regulation compliance and product full disclosure of chemical substances in one easy-to-use package.

The centralized component database for chemical substance data within **GDM-WE** can be accessed by multiple users in the same network, allowing you to:

- Manage the collection and storage of compliance data and documents.
- Perform compliance validation and substance analysis for 27 built-in regulations, including **EU RoHS, EU REACH SVHC/Annex-17/Annex-14, California Proposition 65, China RoHS**, and others. Or define your own rules per your customers' requirements.
- Generate compliance reports and full disclosure reports at the product-level, product family-level, or company-level.
- Install at your facility behind your company firewall so that your data and BOMs are securely protected.
- Import compliance data automatically, and import BOMs from ERP/PLM software programs automatically (optional).
- Integrate with common PLM or ERP systems.

GREENDATA MANAGER WORKGROUP EDITION (GDM-WE)

Flexible Packages to Fit Your Needs

GreenData Manager Workgroup Edition (GDM-WE) can be scaled to meet your company's requirements:

Starter Package

- Server + 2-seat license
- 1st year of Maintenance free
- Client side can be Windows 7/8/10
- Centralized database on MS SQL Server

Additional Options

- Additional seat license is available
- Auto Download Module is available
- Auto BOM Import Module is available
- Conflict Minerals Module is available

Feature Highlights

- Report the **completeness status** on the data or documents that you have collected. **BONUS:** Sign up for our **Data Services**, and GreenSoft's data collection team will collect and validate the data from your suppliers for you!
- Report the **compliance status** on all parts or BOMs, and generate compliance reports for **EU RoHS**, **EU REACH SVHC/Annex-17/Annex-14**, **California Proposition 65**, **China RoHS**, and others. Or define your own rules per your customers' requirements.
- Receive **online updates** of changes to regulations and substance data so you're always dealing with the most up to date information.
- **Import** the component compliance data through **Excel**, **IPC-1752** or **IPC-1752A XML**, or have GreenSoft collect the data and deliver to you through GreenSoft PartData XML format.
- Generate product-level **full disclosure reports** to show the full list of chemicals used in products.
- Generate **product disclosure reports** in **Excel**, **IPC-1752** or **IPC-1752A XML**, and **IEC 62474 XML** formats.
- Keep data **securely stored** behind your own company firewall with the software downloaded on your own company server. All BOM level information is kept within your facility.
- Plus, GDM-WE software has the ability to **classify and process articles** per the updated definition of an "article" under EU REACH.

GREENDATA MANAGER WORKGROUP EDITION (GDM-WE)

A Complete Compliance Management System

For the full details on how **GreenData Manager Workgroup Edition (GDM-WE)** can help your company management data collection, compliance validation, substance analysis, and product-level full disclosure of chemical substances, read on for a step-by-step example of **GDM-WE** features.

1) Data Collection Management

- Import the data you have collected through Excel, IPC-1752 or IPC-1752A XML, or have GreenSoft collect the data and deliver to you through GreenSoft PartData XML format.
- Data can be imported automatically through the Auto PartData Import Module (optional).
- Examine and validate EU RoHS status and Exemption Status provided by suppliers.
- Validate the aggregated substance weight against the component weight or subpart weight with user-defined tolerance.
- Validate the document collection status and expiration status. Receive alerts 30-days before documents expire.

GREENDATA MANAGER WORKGROUP EDITION (GDM-WE)

2) Compliance Validation and Gap Analysis

- Determine compliance status of parts and BOMs immediately. Perform Gap Analysis on selected products (BOMs) for incomplete parts or non-compliance parts inside each BOM.
- Perform compliance validation on one of 27 built-in regulations, or define your own rules per your customers' requirements.
- Perform compliance validation on one regulation for one BOM, or multiple regulations for multiple BOMs.
- Export compliance report and Gap Analysis report to Excel, or report BOM-level compliance in IPC-1752A/IEC 62474 formats.

3) Product Compliance Report

- Validate compliance at the product-level on a specific compliance regulation or any customer-specific requirements.
- Roll-up weight and ppm for each substance or substance group at the product-level or at the component-level (as required for article analysis per the interpretation/definition of an “article” under the EU REACH regulation).
- Generate compliance status for each substance or substance group at the product-level.
- Conduct partial analysis during the data collection process and generate Gap Analysis report for incomplete parts.

See example BOM SVHC Report screenshot on the next page.

5) Product-Level Full Disclosure

- List of all substances used in the product (Product DNA).
- Roll-up weight and ppm for each substance to product level.
- Product level EU RoHS compliance status included.
- Product level EU REACH Substances of Very High Concern (SVHC) compliance status included.
- Export product level full-disclosure report to Excel, IPC-1752, IPC-1752A , or IEC 62474 XML format.
- Exception Report list for parts unable to be included in product rollup.

Product Level Disclosure
Generates Product Level Full Disclosure for the selected BOM. Export the report to Excel or to IPC-1752 Class-6 XML or IPC-1752A XML. Use External BOM ID Mask Trade Secret Substances/Groups

Include Exemptions of Parts without FMD in Homogeneous Excel export

GREENDATA MANAGER WORKGROUP EDITION (GDM-WE)

6) Automation of PartData Import & BOM Import (Optional)

- Complete automation of importing the PartData files if GreenSoft is doing data collection for you.
- Complete automation of importing BOMs from your ERP/PLM system.
- Frees you from the manual work of updating PartData. Simply select the desired BOM and click to generate compliance reports instantly.

The screenshot shows the 'Auto Downloader settings' window. It includes sections for 'Proxy Settings', 'Configuration Preferences', and two tables for 'PartData Sync Statistics' and 'CMData Sync Statistics'. The 'PartData Sync Statistics' table shows metrics like 'Number of Part Numbers in IM', 'MCD Type as Full Disclosure', and 'Lifecycle Status as Active'. The 'CMData Sync Statistics' table shows metrics like 'Declaration Scope as Company' and 'Declaration Scope as Product for List of Products'.

Minimum Requirements

Server:

- Microsoft Windows 10 or Windows Server 2016/2019 (including R2)
- .NET Framework 4.8 or above
- Microsoft SQL Server 2016/2017/2019 Standard/Enterprise Edition
- CPU: Dual Core 2GHz or above; RAM: 8GB or above; HDD: 100GB or above

Client:

- Microsoft Windows 10 or Windows Server 2016/2019 (including R2)
- .NET Framework 4.8 or above
- Adobe Acrobat 9.0 or above
- Microsoft Office tools (such as Excel)
- CPU: 2GHz or above; RAM: 4GB or above; HDD: 5GB or above
