

PFAS SOLUTION

A Proactive Approach to PFAS Compliance

Stay Ahead of Evolving PFAS Regulations

With new PFAS regulations and reporting requirements emerging all the time, ensuring compliance with existing standards while preparing for impending or unexpected changes can be a complex challenge.

Collecting PFAS data from your supply chain is the key to ensuring your business not only meets current standards, but is also primed for future ones.

We Collect the PFAS Data for You

GreenSoft will identify the presence of PFAS in your parts and materials to cover existing PFAS regulations, including **EPA TSCA Section 8(a)(7), reporting requirements in Minnesota and other US states**, and the **proposed ban in the EU**, as well as future PFAS restrictions and reporting requirements.

Comprehensive Supply Chain Data Collection

GreenSoft collects PFAS Data from your supply chain using the **IEC 62474 PFAS reference list**, the **OECD PFAS reference list**, the **EPA PFAS inventory**, and GreenSoft's own reference list, together covering over 15,000 PFAS chemicals.

When PFAS compliance information is not available from the suppliers, we request and collect **Full Material Disclosure (FMD) data** and use it to validate PFAS compliance.

We also use FMD data to validate the accuracy of the PFAS declarations received from your suppliers.

Contact GreenSoft today to ensure your supply chain is fully compliant and protected from the risks associated with PFAS chemicals.

ALL-IN-ONE PFAS SOLUTION

Hands-On PFAS Data Collection

GreenSoft collects PFAS data from your suppliers and follows up with suppliers for clarification and corrections as needed.

Comprehensive PFAS Data Validation

GreenSoft's multi-step validation process ensures the PFAS data that we collect for you is accurate and complete.

PFAS Legislation Monitoring

Our dedicated team monitors updates to PFAS legislation worldwide to notify you when regulations change and new ones arise.

Expert Project Management

A dedicated Project Manager is assigned to your project to provide bi-weekly status updates and keep your project on track.

Manage PFAS Data with GreenData Manager® Software

Designed exclusively for environmental compliance, **GreenData Manager® (GDM)** is the premier software solution for compliance data management, storage and reporting.

- Store and manage all PFAS data collected from your suppliers in one place.
- Generate compliance reports at the company-level, product family-level, or product-level.
- Create a materials database for your company that can be used for all regulations.
- Seamless integration into your existing PLM or ERP system.
